

AMENDMENTS TO THE CLAIMS

1. (Original) An antithrombotic composition characterized in that the composition comprises at least one member selected from the group consisting of fruit or fruit juice of amla and an extract thereof.
2. (Original) A fibrin formation inhibitory composition characterized in that the composition comprises at least one member selected from the group consisting of fruit or fruit juice of amla and an extract thereof.
3. (Original) An anti-platelet aggregation composition characterized in that the composition comprises at least one member selected from the group consisting of fruit or fruit juice of amla and an extract thereof.
4. (Original) A platelet aggregation inhibitory composition characterized in that the composition comprises at least one member selected from the group consisting of fruit or fruit juice of amla and an extract thereof.
5. (Original) A composition for anti-thrombus characterized in that the composition comprises an extract of tea.
6. (Original) A composition for anti-platelet aggregation characterized in that the composition comprises an extract of tea.

7. (Original) An anti-blood coagulant composition characterized in that the composition comprises at least one member selected from the group consisting of fruit, fruit juice or leaf of hibiscus and an extract thereof.

8. (Original) A platelet aggregation preventing composition characterized in that the composition comprises at least one member selected from the group consisting of fruit, fruit juice or leaf of hibiscus and an extract thereof.

9. (Original) A composition for preventing platelet aggregation characterized in that the composition comprises at least one member selected from the group consisting of fruit, fruit juice or leaf of hibiscus and an extract thereof.

10. (Original) A platelet aggregation thrombus inhibitory composition characterized in that the composition comprises at least one member selected from the group consisting of fruit, fruit juice or seed of cocklebur and an extract thereof.

11. (Original) A composition for inhibiting platelet aggregation thrombus characterized in that the composition comprises at least one member selected from the group consisting of fruit, fruit juice or seed of cocklebur and an extract thereof.

12. (Original) A thrombus formation inhibitory agent characterized in that the agent comprises

gymnema, an extract thereof or a mixture thereof.

13. (Original) An extrinsic blood coagulation preventing composition characterized in that the composition comprises *Hizikia fusiforme*, an extract thereof or a mixture thereof.

14. (Original) A thrombus preventing composition characterized in that the composition comprises *Hizikia fusiforme*, an extract thereof or a mixture thereof.

15. (Original) A composition for preventing thrombus characterized in that the composition comprises an enzymatically treated product of *Hizikia fusiforme*, an extract thereof or a mixture thereof.

16. (Original) An antithrombotic agent characterized in that the agent comprises carrageenan.

17. (New) A method for inhibiting and/or preventing thrombus comprising administering the composition according to any one of claims 1, 5, 14 or 15 or the agent according to claim 16 to a patient in need thereof.

18. (New) A method for inhibiting fibrin formation comprising administering the composition according to claim 2 to a patient in need thereof.

19. (New) A method for inhibiting and/or preventing platelet aggregation comprising administering the composition according to any one of claims 3, 4, 6, 8 or 9 to a patient in need thereof.

20. (New) A method for inhibiting for inhibiting blood coagulation comprising administering a composition according to claim 7 to a patient in need thereof.

21. (New) A method for inhibiting platelet aggregation thrombus comprising administering the composition according to claim 10 or 11 to a patient in need thereof.

22. (New) A method for inhibiting thrombus formation comprising administering the agent according to claim 12 to a patient in need thereof.

23. (New) A method for preventing extrinsic blood coagulation comprising administering the composition according to claim 13 to a patient in need thereof.
